

## Feature Focus: AirSync

### DIRECT PUSH SYNCHRONIZATION OVER THE AIR

CommuniGate Pro is a powerful multi-tenant mobile solution with built-in AirSync features supporting a wide range of mobile devices. CommuniGate Pro's Unified Communication applications allow users to have a single identity with multiple device and access methods. Users have the same experiences, and same data, whether they use a mobile device, webmail, the Flash Pronto! UI, Outlook, or Mac clients. These features allow true portability for today's mobile workforce. CommuniGate Pro is the most reliable server built with carrier grade requirements for true 99.999% uptime. Access anywhere, access anytime.

As Aberdeen Research stated, Best-in-Class organizations understand the value of using mobile messaging to communicate with more than just their colleagues, they use mobile messaging to communicate with customers and partners 35% more frequently than others. As an enterprise you need to make communications more effectively. With remote and mobile staff using smartphones you have a higher demand for synchronization needs as a core business requirement.

### The Benefits

**Access from Anywhere** - full over-the-air synchronization of E-mail, Contacts, Calendar, and Tasks

**Store all critical data on a centralized server** - if the mobile device is lost, then you still have your primary data located on the server.

**Unique mixed Enterprise support** - CommuniGate Pro provides Enterprise features for Mac and PC clients which can sync to the iPhone or other devices.

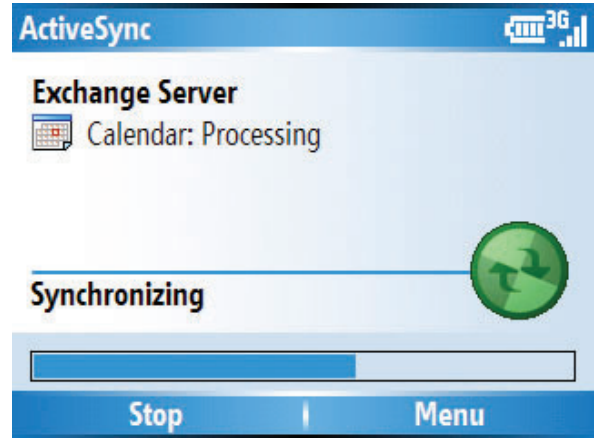

**Widely adopted technology** - provides huge range of choice in mobile devices

**Enterprise Messaging Features** - with the scalability, power, and administration benefits of a Carrier Grade platform.

**Two-way synchronization** - updates on the phone get applied to the central CommuniGate Pro server repository, and updates on the server (via Webmail or other Unified Communications applications) get applied to the mobile devices.

Running CommuniGate Pro allows you to utilize existing mobile contracts (especially 3G/GSM data contracts) as well as Wi-Fi enabled devices to connect to CommuniGate Pro over these data networks.

Users can synchronize their mobile securely using the encrypted HTTPS protocol, and can access this information from anywhere on their mobile devices - in the office, at home, or on the road. With CommuniGate Pro's Mobility Suite you can provide synchronization which interoperates with all of the other client applications and devices at their site, including Outlook, Pronto!, Webmail, and standards-based clients such as Thunderbird or Apple Mail/iCal for IMAP and CalDAV.

## Supported Devices

### Windows Mobile®-based Devices

Exchange AirSync compatibility is built into Windows Mobile-based devices using Windows Mobile 5.0 or 6.0.

### ActiveSync-enabled Devices

There are a variety of non-Windows-Mobile devices which provide applications which support AirSync. These include:

- iPhone
- DataViz® "RoadSync" application
- Nokia® "Mail for Exchange" application – included on E-series devices E50, E61, E62
- Sony® Ericsson® (based on DataViz RoadSync) – includes devices P990, M600, W950
- Palm® – 700 Series Smartphone, Treo™ 680, Treo 650, LifeDrive™ Mobile Manager
- Motorola® MOTOSYNC™ application on Motorola A780 and A910
- Symbian® – various applications
- Helio® Ocean device

### About CommuniGate Systems

CommuniGate Systems develops carrier-class Unified Communications and media delivery software for broadband and mobile operators to deliver value-added services and SaaS solutions. CommuniGate Systems delivers powerful mash-ups of Unified Communications technology mixed with media and entertainment applications for portals, social networks, enterprises and mobile communities. CommuniGate Systems is revolutionizing the Unified Communications industry with a unique Flash-based client framework Pronto! bringing together all forms of communication and breaking the leash to the desktop with Web 2.0 mobility.

CommuniGate Systems is the first choice in technology solutions for over 12,000 customers with over 130 million subscribers unifying e-mail, collaboration, IM, presence and VoIP with a single identity. The Unified Communications platform provides flexibility, performance, and scalability with benchmark proven architecture remaining unchallenged in the industry.
